

Fraud detection and notification module by TailGating for car parkings. The system has two cameras that capture the front and rear license plates of the transit.

In case of fraud detection, the TailGating module can:

- ✦ Send an alarm message to the Parking management system.
- ✦ Record the details of the transit for later review.
- ✦ Activate a siren via relay output.
- ✦ Close additional barrier to prevent the exit of vehicles.

### DEEP LEARNING

High reliability rate due to Deep Learning and Tracking algorithms.

### TOTAL INTEGRATION

It has a protocol for integration to guidance and access control systems from other manufacturers.

### ALL-IN-ONE & PC

All-in-One or Server Based software module.

### SIRAM ACCESS WEB

Program that allows to send to different panels the information of the occupation in real time and to carry out statistical queries of the historical occupation

### TAILGATING ALL-in-ONE

Consisting of:

- 2 x i-Siram All-in-One cameras

### TAILGATING SERVER BASED

Consisting of:

- 2 x OCR cameras
- 2 x Siram OCR
- 1 x I / O Conex

Optional: Siram Web Raspberry to store the movements in which fraud is detected at the exit.
